

Remote Learning

Guidance for parents and students

This is a short, practical guide detailing how we will best support our students through the use of technology to support their learning whilst the school is closed, or a student is unable to attend school.

<p>Google Classroom & Google Meet</p> 	<p>Working Hours</p> 	<p>Normal Timetable</p> 
<p>We will use Google Classroom to set work, host resources and communicate for ALL students in all year groups</p> <p>Google Meet Remote will be used for Live Lessons and our Online Safety and Behaviour Protocols remain in place.</p> <p>All Remote Learning and Live Lesson links will be accessed via Google Classroom.</p>	<p>We will outline to parents that we only expect students to contact you during normal school hours and you can respond when it is possible for you to do so.</p>	<p>Work will be set for students in line with their normal timetable. The work should be ready on Google Classroom for them to complete on the day they normally have their lesson with you and last the duration of their normal lesson.</p>
<p>Scheduling of work</p> 	<p>Normal Curriculum</p> 	<p>Vary tasks and activities</p> 
<p>Your child's teachers will set work via Google Classroom. This will likely include links or instructions for where to find resources (likely to be on either Google Drive, Google Classrooms, Mathwatch or another online platform)</p>	<p>We expect, where possible, for the students to follow the normal curriculum and the work will try to match what you would be expecting them to cover during your normal lessons.</p>	<p>Work set will include a variety of tasks to help with student motivation and be pitched at their ability and sequence in learning.</p>
<p>Parental guidance/input</p> 	<p>Assessment and feedback</p> 	<p>Support with Remote learning</p> 
<p>In order to ensure no moment is lost, parents/carers will be vital in ensuring students are encouraged to work diligently from home. This may also include supporting them 1:1 with the materials we have provided.</p>	<p>Where appropriate, staff have been instructed to set work which can be assessed, and feedback can take place. Students will be expected to submit work either through Google Classrooms or e-mail</p>	<p>The school has provided an instructional video to help students access resources from home. This video has been posted on school website on the Remote Learning Page.</p>
