Medical Policy (with First Aid)

Date: September 2024
Review Date: September 2026
Co-ordinator: Ms J Day

Signed by..... Dawn Mason (Principal)

Signed by..... Kim Bristow (Chair of Governors)

1. Rationale

The Adeyfield Academy is an inclusive community that aims to support and welcome students with medical conditions.

The Adeyfield Academy recognises that section 100 of the Children and Families Act 2014 places a duty on the Governing Body to make arrangements for supporting students at The Adeyfield Academy with medical conditions.

This policy will make clear to all colleagues the procedures to be followed in supporting these Students.

Every member of the school community has the right to feel safe and valued.

2. Aims

The Adeyfield Academy aims to provide all students with medical conditions the same opportunities as the remainder of the student body.

- To ensure that staff understand the common medical conditions that affect students at The Adeyfield Academy and understand that many of the conditions may affect quality of life and may be life threatening, particularly if poorly managed or misunderstood.
- To ensure that all staff understand and are trained in what to do in an emergency for the most common serious medical conditions at The Adeyfield Academy.
- To ensure clear guidance on the administration and storage of medication.
- To ensure clear guidance about record keeping.
- To ensure that the Academy's environment is inclusive. This includes the physical environment, as well as educational, social and sporting activities.
- To enable staff to understand the impact of medical conditions on a student's ability to learn and their confidence.
- To enable staff to promote self-care.
- To ensure that the Adeyfield community is aware of the common triggers that can make medical conditions worse.

3. Procedures

3.1. Support for and expectation of staff

- Staff at The Adeyfield Academy receive appropriate training regarding serious medical conditions and what to do in an emergency. This training is provided upon induction into the academy and through access to relevant information.
- In an emergency situation, academy staff are required, under common law duty of care, to act like any reasonably prudent parent. This may include administering medication. This will be made clear during training who has additional responsibility within The Adeyfield Academy.
- Action for staff to take in an emergency for the common most serious conditions at The Adeyfield Academy.
- If a student needs to be taken to hospital, a member of staff will always accompany them and will stay with them until a parent or carer arrives. A copy of the student's Individual Medical Plan (where appropriate) will be sent to the emergency care setting with the student.
- A log of First aid/incidents will be kept by the academy's First Aiders using an electronic reporting system

- All staff have a copy of 'First Aid in the classroom' this will be followed in the event of any medical/first aid need
- It is the responsibility of parents to inform the academy of any medical condition/updates
- Students are not to contact home directly/requesting collection - All students will be made aware of the procedure for requesting medical/first aid support and a designated first aider will contact home when applicable.
- Senior staff will agree when applicable to a student being collected/advice will be given on follow up medical support when required.
- All head injuries will require a concussion check with a qualified first aider. A call will be made to a named contact of student or a note given to them in the event contact cannot be made.

3.2. Individual Medical Care Plans

- Medical Care Plans are led and managed by the SENCo who will ensure all relevant staff are aware of their location and content. These plans will be administered by the First Aiders.
- The Medical care plan records important details about individual student's medical needs at school, their triggers, signs, symptoms, medication and other treatment (Appendix 1). It is set up at admission or when the diagnosis is first communicated to the academy.
- Parents, healthcare professionals, relevant academy staff and students with a medical condition can draw up a student's Individual medical care plan. Depending on the complexity or severity of the condition this plan may be drawn up at a meeting that all attend or in consultation and sent home to parents. A copy must be agreed by the parents and kept at the academy and home.
- Medical care plans are used to create a centralised register of students with medical needs and are stored electronically and also attached as a linked document in SIMS.
- Parents are regularly reminded to update their child's Individual Healthcare Plan if their child has a medical emergency, if there have been changes to their symptoms (getting better or worse), or when their medication and treatments change.
- Every student with a Medical care plan at The Adeyfield Academy has their plan discussed and reviewed at least once a year.
- All relevant staff have access to the Individual Healthcare Plans of students in their care.
- All staff are responsible for the protection of student confidentiality.

3.3. Management of medicines on school premises

- All medication is kept in a lockable cupboard, in a temperature appropriate place. Only named staff have access. Students with medical conditions know where their medicine is stored and how to access it. Most students at the academy carry, and securely keep, their own emergency medication. They are reminded to ensure that their emergency medication is with them at all times. Back-up emergency medication may be available in the medical room. (This is at the discretion of a medical practitioner) Where a student is not yet able to self-manage and carry his/her own emergency medication, she/he knows where to access the emergency medication.
- All use of medication, defined as a controlled drug, even if the student can administer the medication themselves, is done under the supervision of named staff.
- There is no legal duty for any member of staff to administer medication unless they have been specifically contracted to do so. Staff may administer prescribed and non prescribed medication to students under the age of 16 with the written consent of the student's parent. A record of this will be kept.

- Training is given to all staff members who agree to administer medication to students, where specific training is needed. Where suitably risk-assessed, the academy's insurance provides full indemnity.
- Parents should complete the parental agreement for the academy to administer medicine (Appendix 2) or provide the same information in a letter.
- If a child's medication changes or is discontinued, or the dose or administration method changes, parents should notify the academy in writing immediately.
- If a student at The Adeyfield Academy refuses their medication, staff will record this and follow procedures. Parents are informed as soon as possible.
- If a student misuses medication, either their own or another student's, their parents are informed as soon as possible. These students are subject to the academy's usual disciplinary procedures.
- Staff ensure that medication is only accessible to those it is prescribed.
- Termly a first aider checks and logs the expiry dates for all medication stored at the academy.
- An up-to-date list of members of staff that are registered first aiders and who have agreed to administer medication and have received the relevant training is kept in the academy and displayed in key areas
- All emergency and non-emergency medication brought in to the academy must be clearly labelled in its original container, with the correct student's name, the name and dose of the medication and the frequency of dose, expiry date and the prescriber's instructions (if applicable)
- Any refrigerated medication is stored and is clearly labelled.
- All medication is sent home with students or collected by parents if necessary at the end of the school year. Medication is not stored during the summer holidays.
- It is the parents' responsibility to ensure new and in date medication comes into the academy on the first day of the new academic year.
- An accurate record of each occasion an individual student is given or supervised taking medication is kept. Details of the supervising staff member, student, dose, date and time are recorded (Appendix 3).
- The academy can dispose of medication once parents have been informed.
- Sharps boxes are used for the disposal of needles. Parents can obtain sharps boxes from the child's GP or paediatrician on prescription.
- Any stored inhalers should be stored below 30 Degrees Celcius

3.4. Management of medical conditions and medicines on school trips

- Students with serious medical conditions are required to inform The Adeyfield Academy.
- The leader of the trip will risk assess the needs of the student. If the needs are sufficient, which will be decided by the Principal, an updated plan may be required.
- Staff members taking a student on a trip, where necessary will be given the necessary training to enable them to manage the student's medication and/or emergency procedures, prior to departure. Liaison with the named members of staff who usually administer that student's medication is essential.
- A copy of the updated Medical care plan will be retained by the senior leader with responsibility for the trip.
- In the event of an emergency, a member of staff will accompany the student to hospital.
- A contingency plan will be agreed with parents, in advance, should an emergency arise. This will form part of the updated plan.
- The trip leader will take responsibility for the safe-keeping of medication.
- Parents/Carers must be available on an accessible phone number for the duration of the trip.

- If a sharps box is required for an off-site or residential visit, a named member of staff is responsible for its safe storage and return to a local pharmacy, to the academy or to the student's parent.

3.5. Allergies

In line with advice from Allergy UK, The Adeyfield Academy is not a nut (or any other product) free school. Students are permitted to bring their own food onto site and as such, we cannot guarantee its contents. Parents should inform the academy of any allergies that their son/daughter has and this will be recorded as a medical need on SIMS.

Students with severe allergies have a Medical Care Plan with treatment plan outlined. Students with an epi-pen should carry one at all times. First Aiders and additional staff are trained in their use. Students with allergies should not share food with others.

4. Monitoring

- This policy will be monitored by the Senior Leadership Team and Governors to ensure that all employees comply with their professional requirements and procedures are appropriately adopted as required.
- The log of medical emergencies and medication logs will be reviewed termly.
- The Principal will ensure compliance with all medical conditions related to offsite visits.
- The Assistant Headteacher, alongside the safeguarding team will ensure the implementation of this policy, under the guidance of the Principal.

Contacting Emergency Services

Request and ambulance – dial 999, ask for an ambulance and be ready with the information below. Speak clearly and slowly and be ready to repeat information if asked.

1. Your telephone number – 01442 406020
2. Your name
3. Your location – Longlands, Hemel Hempstead, Herts, HP2 4DE
4. Provide the exact location of the patient with the academy
5. Provide the name of the child and
6. A brief description of their symptoms
7. Inform Ambulance Control of the best entrance to use and state that the crew will be met and taken to the patient
8. Complete the table below and keep this form by the phone

You have given:

	✓
The telephone number (01442 406020 / or your mobile number)	
Your name	
Your location	
The name of the child	
A brief description of their symptoms	
The exact location of the patient with the school	
Ambulance Control the location of best entrance to use and stated that the crew will be met and taken to the patient	

Your Name: _____

Position at The Adeyfield Academy: _____

Signature: _____ Date: _____

Allergy Guidance

Allergy is a hypersensitivity to a foreign substance that is normally harmless, but which produces an immune response reaction in some people. This can be a minor response such as localised itching or a severe response known as anaphylaxis or anaphylactic shock. Anaphylaxis is potentially life threatening, often explosive in onset with symptoms ranging from mild flushing to upper respiratory obstruction and collapse.

The Adeyfield Academy takes a serious approach to the risk of anaphylaxis. This guidance outlines the responsibilities expected of those within the school community. We aim to ensure all students with allergies are fully supported and feel safe at the academy, and that staff are confident in treating anaphylaxis.

Please note that The Adeyfield Academy is not a nut-free environment as we believe this can lead to a false sense of security and we prefer that Students and staff remain vigilant at all times.

1. Parents

- On entry to The Adeyfield Academy, parents should inform The Adeyfield Academy via the essentials forms, of any history of allergy, highlighting previous severe allergic reactions, and any history of anaphylaxis.
- Parents will be sent an Individual Health Care Plan for completion and return to the First Aiders in the academy's office.
- Parents are responsible for ensuring any required medication (Epipens or other adrenalin injectors, inhalers and any specific antihistamine – Piriton is always kept on site) is supplied, in date and replaced as necessary.
- Where food allergy is a major concern, the parents may wish to discuss the issues with the Catering Manager to make a plan to reduce potential exposure.
- If an episode of anaphylaxis occurs outside school, the Academy First Aiders must be informed. Parents are requested to keep the Academy First Aiders up to date with any changes in allergy management with regards to clinic summaries or re-testing and new food challenges.

2. Students

- Students of any age must be familiar with what their allergies are and the symptoms they may have that would indicate a reaction is happening
- Students who are trained to administer their own auto-injector should be encouraged to carry it on their person

3. Academy First Aiders

- Once aware of an allergy the Academy First Aiders should ensure the parent and student complete an allergy care plan and that sufficient emergency supplies are kept on site.
- Spare adrenaline pens should be kept at an appointed place clearly marked with each Student's name and also any other medication that might be used such as a spare inhaler and antihistamine. A copy of their care plan is also available at this location.
- The allergy will be highlighted in SIMS under the Medical Needs section.
- IHCP are available in the Medical Room, detailing the action to be taken in an emergency.
- All Students will be assessed for their competence of managing their allergies and emergency medication and training will be given where necessary.

4. Staff

- Staff must be aware at all times of the Students in their care (regular or cover classes) who have known allergies and must supervise any food-related activities with due caution. All leaders of school trips must ensure they are competent to act in case of anaphylaxis prior to the trip departure and ensure they carry all relevant emergency supplies. This includes educational visits and 'away' sport fixtures.
- Annual training for staff in anaphylaxis is provided

5. Wider School Community

- The catering department is aware of all individual Student allergies and provides clear labelling to all food served in the Restaurant at all times.
- Parents are informed of the clear labelling policy for any food that they wish to send in to the academy either for their child's personal consumption or for others consumption in sharing situations such as charity bake sales.
- Student awareness of allergies is raised at assemblies and within the classroom setting.
- Training is provided for all staff on a regular basis and on an ad-hoc basis.
- Litter control is kept to a high standard in order to reduce risk of any accidental cross-contamination.

6. Symptoms of allergic reactions Mild allergic reactions

- Rash
- Vomiting
- Abdominal cramps
- Localised tingling sensation
- Localised inflammation

7. Symptoms of severe allergic reaction

- Swelling of the throat and mouth
- Difficulty in swallowing or speaking
- Difficulty in breathing due to severe asthma or throat swelling
- Hives anywhere on the body
- Generalised flushing of the skin
- Abdominal cramps, nausea and vomiting
- Sudden feeling of weakness, faintness caused by sudden drop in blood pressure
- Collapse and unconsciousness

8. Treatment

Staff should take a student to the first aid room or call the Academy First Aiders if student is on school site. In an emergency a member of staff will administer medication if the student has it with them e.g. EpiPen.

- First Aiders will administer medication in line with the IHCP. Emergency Anaphylaxis Kits are available in the medical room at Main Reception. Alternatively, emergency kits will be found at St Albans Hospital. Parents will be informed immediately.
- If the reaction is severe or symptoms occur in an undiagnosed individual First Aiders will call the emergency services and follow instructions.
- For more information on allergies please see the AllergyUK website www.allergyuk.org, or call them on 01322 619898.

First Aid Procedure during Class time

Sending students out of class due to illness

In the event that a Teacher feels a student is ***too unwell to remain in their class**** the Teacher should request a First Aider, a list of which is in every classroom, by on-call/sending a responsible student. Do not allow students to leave your room even with supervision.

A member of First Aid will come to the classroom and see the student outside. They will then make the decision to either keep them, return them to class/ further medical intervention.

If it is judged that a child needs to be sent home or parents contacted the call will be made by the HOY/First Aider and a record will be kept. This could be agreed beforehand by JDY/CAR/IWK.

Minor accidents or injuries during class time

Should a student suffer a minor injury during class time, this should be dealt with within the department or faculty. Each department has a fully stocked first aid box and access to a qualified first aid responder to deal with minor injuries. Minor injuries (bruises, small cuts, grazes, headache/feel sick- no vomit etc.) ***can be dealt with by a non-First Aider*** Please do not send students to LRC/Student Support Hub

Each student with a recognised medical condition that requires prescribed drugs has it logged on their SIMs record; these will include Diabetes, Asthma, and Allergies. Epipens, inhalers and insulin will be kept in a locked cabinet in the Medical room. Where appropriate students may also have a full medical plan which is reviewed regularly by JDY.

Prescribed medication for short term illness/condition will be kept in the locked cabinet in the medical room. ***Wherever possible students/parents are encouraged to self-administer*** as staff may not always be available at prescribed times. Parents/carers can complete a medication consent form which allows key staff to administer medication or supervise a student to do so.

Major accidents/illness or incidents requiring external services*

In the event of a major accident or incident a Fully Qualified First Aider must be present and should have a telephone with them. Information can be sent to Reception or the Lead Admin to phone for emergency services. The Fully Qualified First Aider should remain with the student/s until the emergency services arrive.

****Too unwell to remain in the classroom/ Major accidents/illness may include:***

Unconsciousness, or lack of full consciousness (i.e. difficulty keeping eyes open), confusion strange or unusual behaviour – such as sudden aggression, any problems with memory, persistent headache, disorientation, double vision, slurred speech or other malfunction of the senses, extreme nausea and vomiting, unequal pupil size, pale yellow fluid or watery blood coming from ears or nose, bleeding from scalp that cannot quickly be stopped, loss of balance, loss of feeling in any part of body, general weakness, seizure or fit.

All first aid incidents/requests must be logged by the faculty designated first aider (adding medical event on the tracker in the FIRST AID/Medical shared area)

All staff can enquire as to whether a student has water/eaten and allow them to refill a bottle particularly during high temperatures
